# PRE TEST

1. What does MARCH PAWS stand for?

M:

P:

A:

A:

R:

W:

C:

S:

H:

2. Circle all the phases of TC3:

A. CUF

B. TFC

C. FCT

D. TEC

3. Name two things from your BFAK or UNTP (Medical Kits) that can be used in your MARCHPAWS protocol.

4. What does MIST stand for?

M: Mechanism of injury

I:

S: Signs and symptoms

T:

5. True or false:

When in doubt in case of a massive bleeding it is better to first try a pressure dressing and move on to a TQ if pressure dressing is not effective.

6. Name two types of wound packing gauze and give one difference.

7. Name a method to create an open airway.
8. True or false:  
The nasopharyngeal airway can be used on conscious as unconscious patients
9. Give two signs or symptoms of a pelvic fracture.
10. Give two signs and symptoms of SHOCK.
11. What does AVPU stand for:
- A: Alert
  - V:
  - P: Pain
  - U:
12. What can we use to prevent Hypothermia in MARHPAWS.
13. As an FMA, what is your first priority during Care Under Fire?
- A. Ignore hostile fire to treat the casualty.
  - B. Return fire and take cover.
  - C. Remove the casualty from a burning vehicle.
  - D. Make sure the casualty has a patent airway.
